Larry also reported that he had spoke with the City Engineer concerning obtaining a third handicap parking place. We can have three handicap parking spaces, but one of our present spaces is not ADA compliant. In order to be compliant there must be an island on either side of the designated handicap space. The handicap space closest to the stop sign is ADA compliant and can remain. The other two will be on each side of the alley. Motion passed with Larry to proceed . Larry suggested that Father inform the parishioners as to the status of the handicap spaces.
